- Leveraging individual assets

Beyond technical ability, I excel in:

- Effective communication
- Effective time management
- Project coordination

- Quality management experience
- Storyboard planning
- User experience research
- Constructive feedback analysis
- Team leadership
- Team development
- Organizational growth strategies
- Effective cross-cultural communication
- Strategic development planning
- Managing quality compliance
- Fostering team engagement
- Problem-solving mindset
- Project management experience

MAIN PROJECTS

Working/Project Experience

Geojit IFSC

Position: Frontend Developer

Project Description:

Geojit IFSC Limited, a wholly owned subsidiary of Geojit Financial Services Limited, gives multiple opportunities to its customers while being situated in India's first IFSC at GIFT City, Gandhinagar, Gujarat.

Responsibilities: Frontend Development.

Tech Stacks: HTML5, CSS3, SASS, jQuery, JavaScript.

Geojit TDS

Position: Frontend Developer

Project Description:

It's a tax computation module to compute and deduct TDS on gains generated by clients in the NRO CM category who are non-residents. Automate the computation of net capital gain or loss for NRO CM clients on the transactions of sales done every day by these clients. Customers to be provided with a tax computation (TDS) report on request, like a tax statement P&L report, but including the tax computed and remitted.

Responsibilities: Frontend Development.

Tech Stacks: HTML5, CSS3, SASS, jQuery, JavaScript.

Sirius

Position: Frontend Developer

Project Description:

Sirius is a tiny but mighty product design consultancy on a mission to create world-class UX/UI design for your startup or organization. Based in Dubai, we are an army of two with over 33 years of end-to-end product experience gained from 8 ambitious startups, 6 leading organizations, and Stanford University.

URL: sirius.design

Responsibilities: Frontend Development

Tech Stacks: HTML5, CSS3, SASS, jQuery, JavaScript, Webflow

Jotavirtual

Position: Frontend Developer

Project Description:

Jotavirtual is a software solution that simplifies the sale of 3D surveys using Matterport technology. It offers intuitive user management and enables easy space management, allowing users to add, edit, share, and remove 3D spaces. By leveraging

Matterport's immersive experiences, Jotavirtual helps businesses expand their online presence and attract clients with impressive visuals.

Responsibilities: Frontend Development, Site Maintenance, and Updating.

Tech Stacks: HTML5, CSS3, SASS, jQuery, JavaScript.

Craft Interiors

Position: Frontend Developer

Project Description:

At Craft Interiors, we have a team of technically qualified architects, interior designers, project managers and more who brainstorm your dream space into the best design themes.

URL: <https://craft-interiors.net/>

Responsibilities: Frontend Development, Site Maintenance, and Updating.

Tech Stacks: HTML5, CSS3, SASS, jQuery, JavaScript, Webflow

Spektra - Cloudevents, Cloud Connect, Azure Expert Assessment

Position: Frontend Developer

Project Description:

Enabling organizations around the globe to continue to innovate and stay relevant in the ever-changing technology world. Our products and services come with personalized white-glove onboarding and account managers to ensure our customer's and partners' success.

Responsibilities: Frontend UI Development, Site Maintenance, and Updating.

Tech Stacks: HTML5, CSS3, SASS, jQuery, JavaScript, React/Angular UI

Accubits

Position: Frontend Developer

Project Description:

Accubits Technologies is a full-service software provider offering product development and digital transformation services to governments, tech startups, Fortune 1000 companies, and businesses. Accubits help organisations be future-proof through data-driven mobile, cloud, and web solutions.

URL: accubits.com

Responsibilities: Frontend UI Development, Site Maintenance, and Updating.

Tech Stacks: HTML5, CSS3, SASS, jQuery, JavaScript, React/Angular UI

Emotyx

Position: Frontend Developer

Project Description:

Emotyx is a software suite built with computer vision and artificial intelligence technologies to enable real-time video analytics for surveillance, customer tracking, and to generate emotion-based business insights from analyzing crowds in a facility.
